

Bridging the Technological Gap

July 31 - August 6, 2022 German Primate Center, Göttingen

Spreading technological innovations
to study the human and animal mind

Technological innovations revolutionize the study
of cognition and behavior across species.

This workshop aims to train early career researchers
in **non-invasive technological methods** to study the
cognition and behavior of human and non-human animals.

During **lectures** and **hands-on training sessions**, participants
will gain expertise with **motion tracking, eye tracking, pupillometry,**
thermal imaging, and **machine learning equivalents**.

Workshop participation is free. We invite **early career researchers**
from all related disciplines to apply until the April 30th, 2022.
